How to build this business?

Network marketing works on the Law of Multiplication. It is different from traditional way of doing business where we depend on the sale of the retail counter. But in network marketing we depend on the success of our teams. "Help them achieve their goals and see your income growing". You can't earn big by selling advertisements so focus on building teams. We have tried to pass a message through our reward plan – to sponsor 5 advertising customers and teach them to sponsor 5 advertising customers each. But, you can sponsor as many dealers and advertising customers as you can. If you have sold less advertisements and have more teams, we think your earning can be more. Moreover you can manage to get the annual renewals also. If you have more advertisers, ask them to refer customers to lower the cost of their advertising.
